FSD2 LAB • EXPERIMENT 03

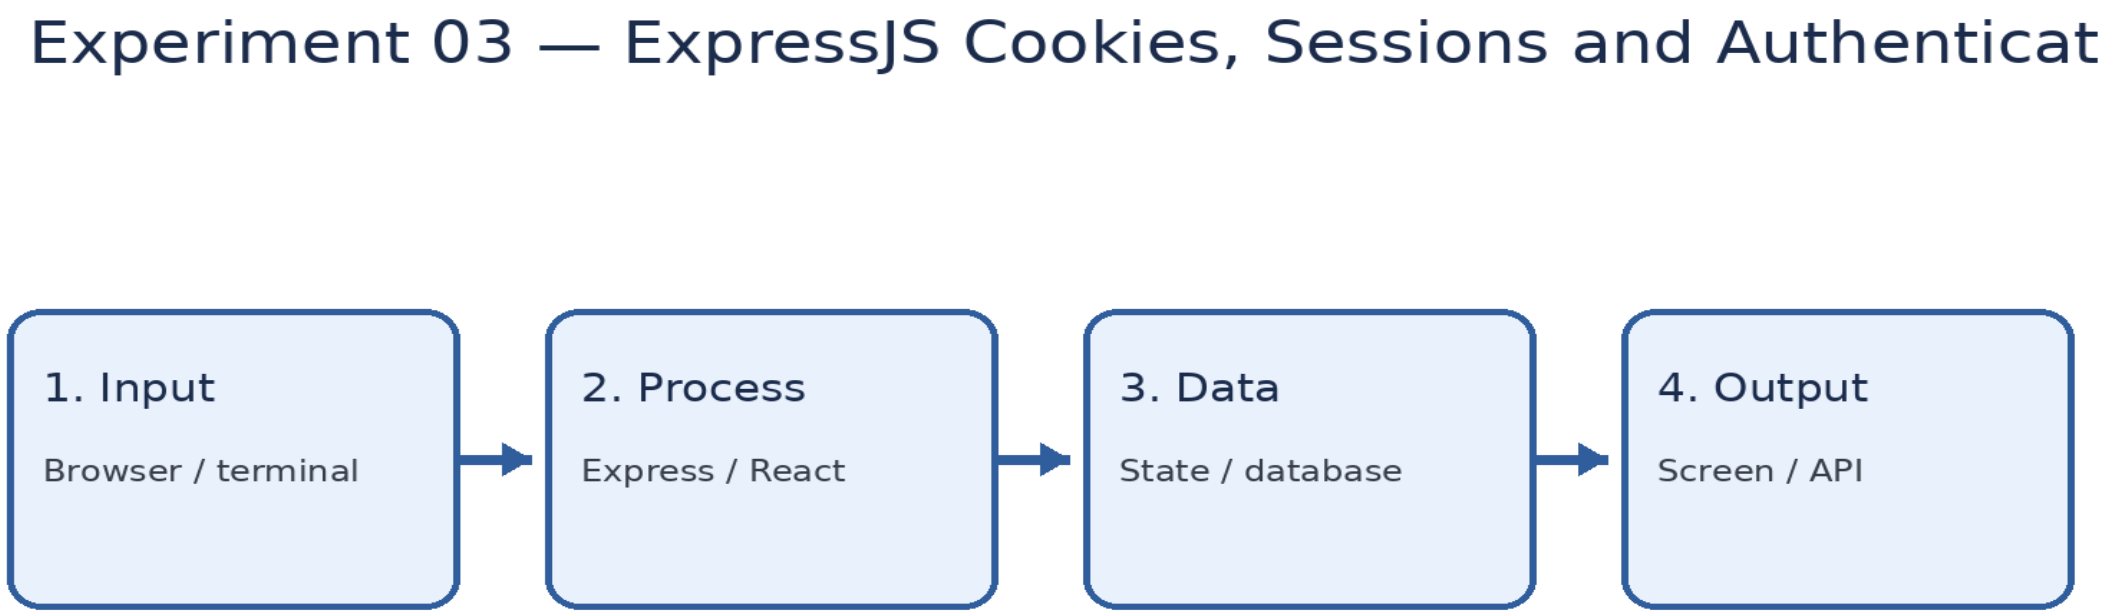

Experiment 03 — ExpressJS Cookies, Sessions and Authentication

GitHub-readable preview of the presentation. Download the matching .pptx for the editable PowerPoint.

1. Syllabus tasks

- See the experiment README for the exact syllabus task.

2. Workflow

Workflow: input → processing → data/state → output

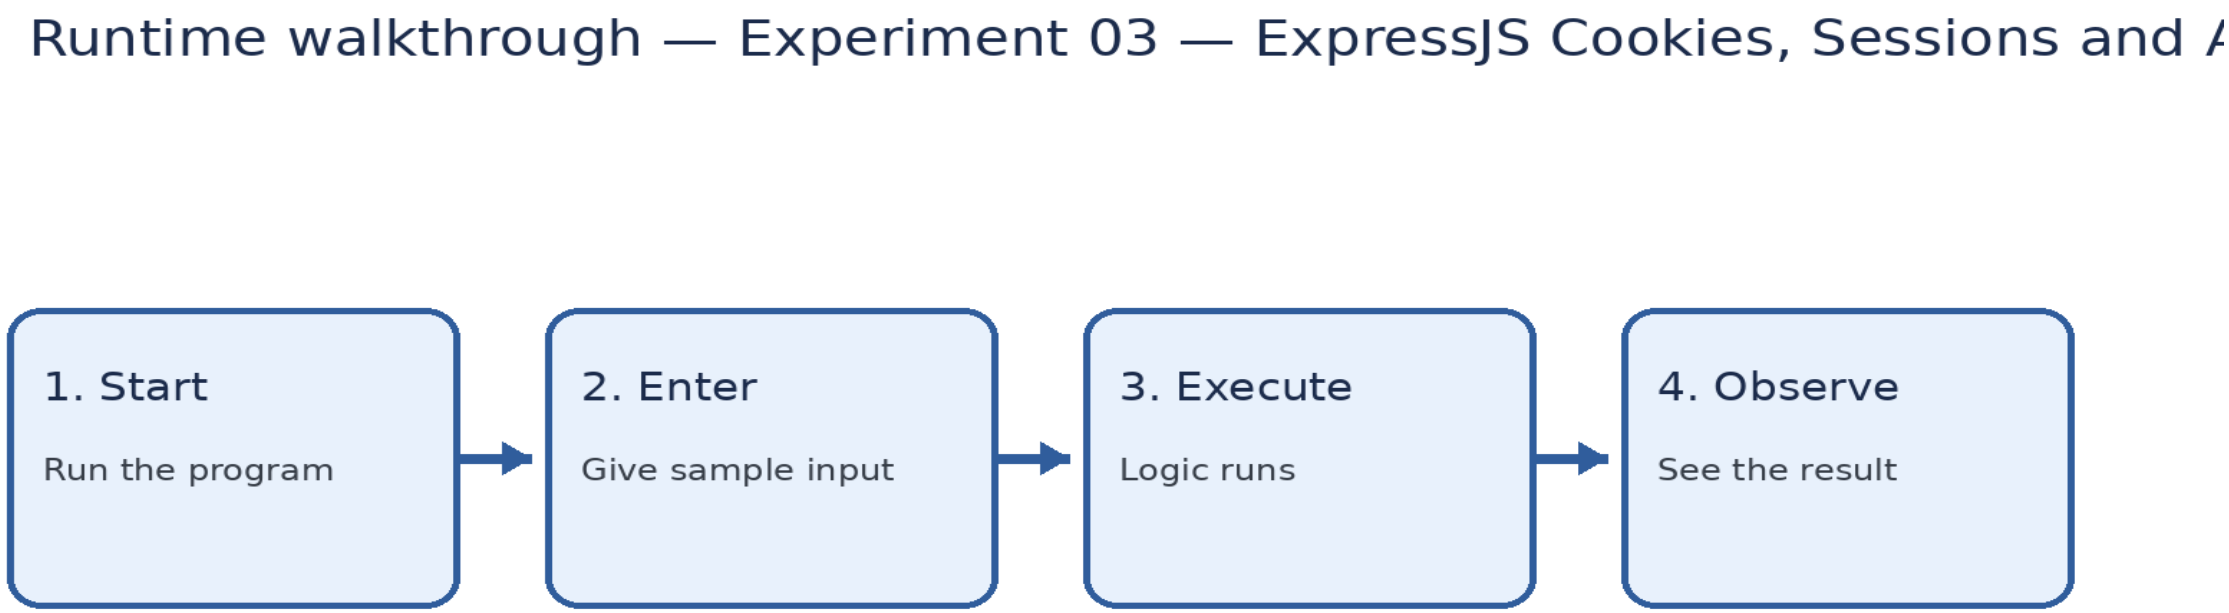

3.1. Code pathway — app.js

```
1 /**
2 * Experiment 03(a): Cookie and session management.
3 *
4 * Run: node 03-express-cookies-sessions-authentication/app.js
5 * Open: http://localhost:3003
6 *
7 * Try /set-cookie, /get-cookie, /visit and /destroy-session.
8 */
9 const express = require('express');
10 const cookieParser = require('cookie-parser');
```

3.2. Code pathway — app.js

```
11 const session = require('express-session');
12
13 const app = express();
14 const PORT = 3003;
15
16 app.use(cookieParser());
17 app.use(session({
18 secret: process.env.SESSION_SECRET || 'fsd2-classroom-session-secret',
19 resave: false,
20 saveUninitialized: false,
```

4. Runtime walkthrough

Runtime: start → enter → execute → observe

5. Run and observe

- Start the server / Vite app or open the MongoDB shell as described in the experiment README.
- Enter the sample input or call the required route.
- Watch the terminal for logs and errors.
- Verify the browser, API response, or database result.

6. Viva questions

- What is the purpose of this experiment?
- Which input is required?
- Which line or command performs the main operation?
- What output should you observe?
- What happens when the input changes?
