

Experiment 10 — MongoDB Installation, Configuration and CRUD

GitHub-readable preview of the presentation. Download the matching .pptx for the editable PowerPoint.

1. Syllabus tasks

- Select a database.
- Insert student documents.
- Find all documents.
- Filter documents by branch.
- Update a document.
- Delete a document.
- Display the final collection.
- queries.js — readable, sectioned mongosh commands.

2. Workflow

Experiment 10 — MongoDB Installation, Configuration and CRUD

Workflow: input → processing → data/state → output

3.1. Code pathway — queries.js

```
1 /**
2  * Experiment 10: MongoDB Installation, Configuration and CRUD
3  *
4  * Run this file inside mongosh.
5  *
6  * Demonstrates:
7  * - Database selection
8  * - Insert
9  * - Find
10 * - Update
```

3.2. Code pathway — queries.js

```
11 * - Delete
12 */
13
14 // -----
15 // Select database
16 // -----
17
18 use fsd2lab;
19
20 // -----
```

4. Runtime walkthrough

Runtime walkthrough — Experiment 10 — MongoDB Installation, Configurati

Runtime: start → enter → execute → observe

5. Run and observe

- Start the server / Vite app or open the MongoDB shell as described in the experiment README.
- Enter the sample input or call the required route.
- Watch the terminal for logs and errors.
- Verify the browser, API response, or database result.

6. Viva questions

- What is the purpose of this experiment?
- Which input is required?
- Which line or command performs the main operation?
- What output should you observe?
- What happens when the input changes?
