

FSD2 LAB • EXPERIMENT 03

ExpressJS Cookies, Sessions, Authentication

GitHub-readable preview of the presentation. Download the matching .pptx for the editable PowerPoint.

1. Syllabus tasks

- Write a program for session management using cookies and sessions.
- Write a program for user authentication.

2. Workflow

ExpressJS Cookies, Sessions, Authentication

Workflow: input → processing → data/state → output

3.1. Code pathway — app.js

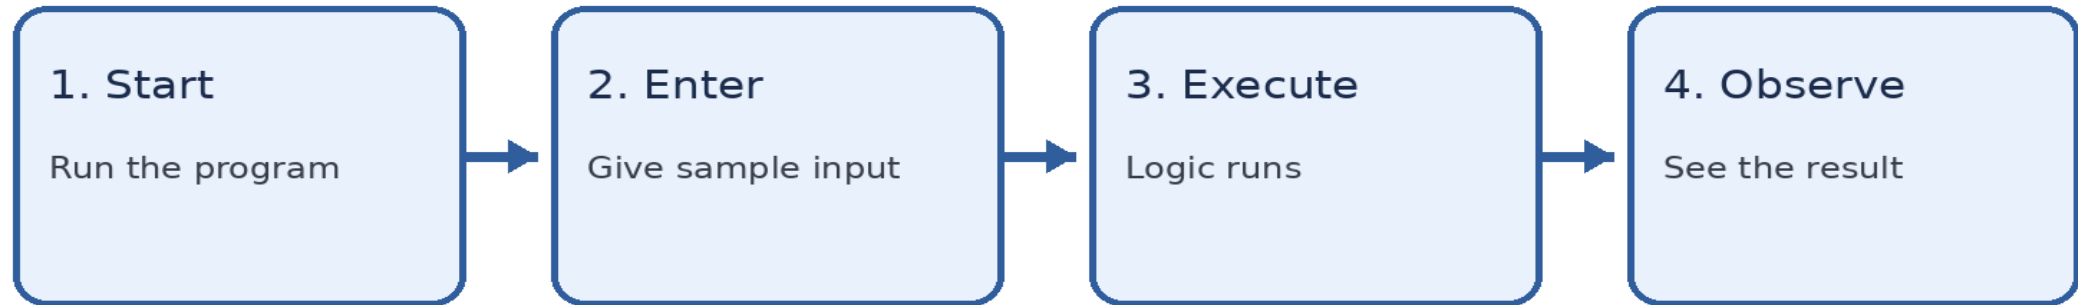

```
1 const express = require('express');
2 const cookieParser = require('cookie-parser');
3 const session = require('express-session');
4 const app = express();
5 const PORT = 3003;
6
7 app.use(express.urlencoded({ extended: true }));
8 app.use(cookieParser()); // Reads cookies from the request.
9 app.use(session({
10   secret: 'fsd2-demo-secret',
```

3.2. Code pathway — app.js

```
11 resave: false,  
12 saveUninitialized: false,  
13 }));  
14  
15 app.get('/', (req, res) => {  
16   res.send(`<h2>FSD2 Authentication Demo</h2>  
17   <form method="post" action="/login">  
18     <input name="username" placeholder="username"><br>  
19     <input name="password" type="password" placeholder="password"><br>  
20     <button>Login</button>
```

4. Runtime walkthrough

Runtime walkthrough — ExpressJS Cookies, Sessions, Authentication

Runtime: start → enter → execute → observe

5. Run and observe

- Start the server / Vite app or open the MongoDB shell as described in the experiment README.
- Enter the sample input or call the required route.
- Watch the terminal for logs and errors.
- Verify the browser, API response, or database result.

6. Viva questions

- What is the purpose of this experiment?
- Which input is required?
- Which line or command performs the main operation?
- What output should you observe?
- What happens when the input changes?
