

FSD2 LAB • EXPERIMENT 05

ReactJS Render HTML, JSX, Function and Class Components

GitHub-readable preview of the presentation. Download the matching .pptx for the editable PowerPoint.

1. Syllabus tasks

- Render HTML to a web page.
- Write markup with JSX.
- Create and nest function and class components.
- Added a third `` using personal name, branch, year and CGPA props.
- `StudentCard.jsx` shows how a reusable child component receives props.

2. Workflow

ReactJS Render HTML, JSX, Function and Class Components

Workflow: input → processing → data/state → output

3.1. Code pathway — index.html

```
1 <!doctype html><html><head><meta charset="UTF-8"><meta name="viewport" content="width=device-width,initial-scale=1"><title>FSD2 React Experiment
05</title></head><body><div id="root"></div><script type="module" src="/src/main.jsx"></script></body></html>
```

3.2. Code pathway — StudentCard.jsx

```
1 // A simple reusable component that receives student details through props.
2 function StudentCard({ name, branch, year, cgpa }) {
3   return (
4     <div className="student-card">
5       <h2>{name}</h2>
6       <p><b>Branch:</b> {branch}</p>
7       <p><b>Year:</b> {year}</p>
8       <p><b>CGPA:</b> {cgpa}</p>
9     </div>
10  );
}
```

4. Runtime walkthrough

Runtime walkthrough — ReactJS Render HTML, JSX, Function and Class Components

Runtime: start → enter → execute → observe

5. Run and observe

- Start the server / Vite app or open the MongoDB shell as described in the experiment README.
- Enter the sample input or call the required route.
- Watch the terminal for logs and errors.
- Verify the browser, API response, or database result.

6. Viva questions

- What is the purpose of this experiment?
- Which input is required?
- Which line or command performs the main operation?
- What output should you observe?
- What happens when the input changes?
