

ReactJS Conditional Rendering, Lists and React Forms

Experiment 07 • Runtime walkthrough

ReactJS Conditional Rendering, Lists and React Forms

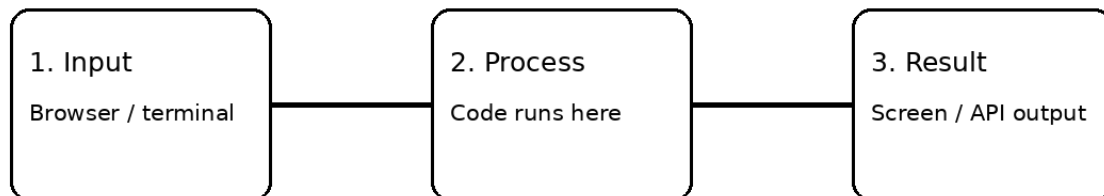

FSD2 learning aid: follow the request/value from left to right.

Syllabus tasks

- Implement conditional rendering.
- Render lists.
- Work with different form fields using React forms.
- Added `EventDemo` with a `name` state starting as an empty string.
- Added a controlled text input using `value` and `onChange`.
- The page immediately displays `Hello, {name}!` while the user types, with no submit button.

Runtime: input → processing → output

Runtime walkthrough — ReactJS Conditional Rendering, Lists and

FSD2 learning aid: follow the request/value from left to right.

What to observe

- Start the server or Vite app.
- Enter sample input / call the route.
- Watch the terminal for logs or errors.
- Observe the browser/API/database result.
