FSD2 LAB • EXPERIMENT 01

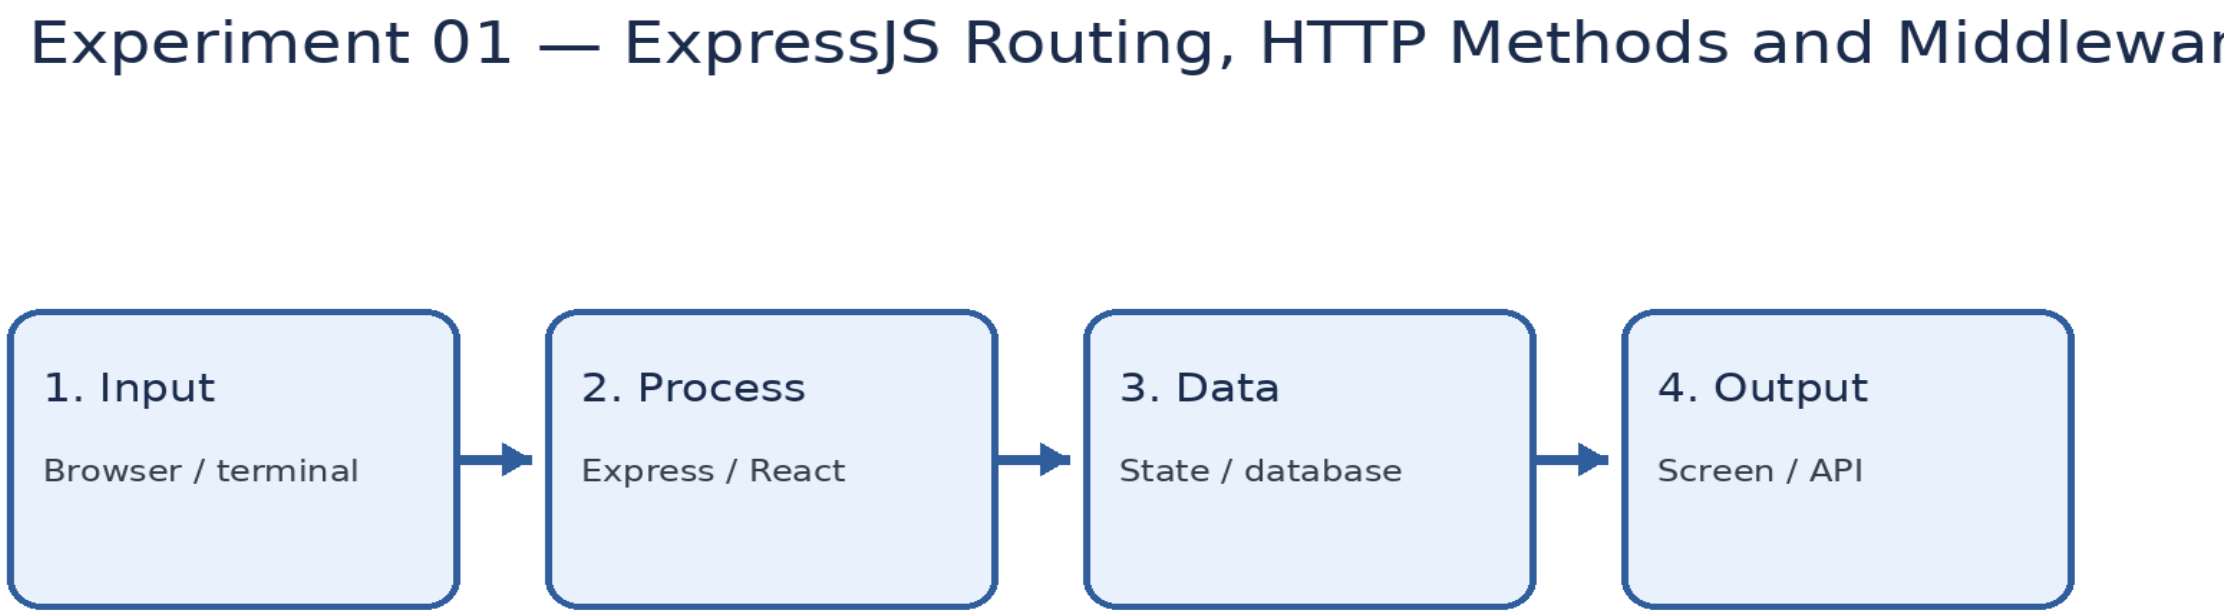

Experiment 01 — ExpressJS Routing, HTTP Methods and Middleware

GitHub-readable preview of the presentation. Download the matching .pptx for the editable PowerPoint.

1. Syllabus tasks

- See the experiment README for the exact syllabus task.

2. Workflow

Workflow: input → processing → data/state → output

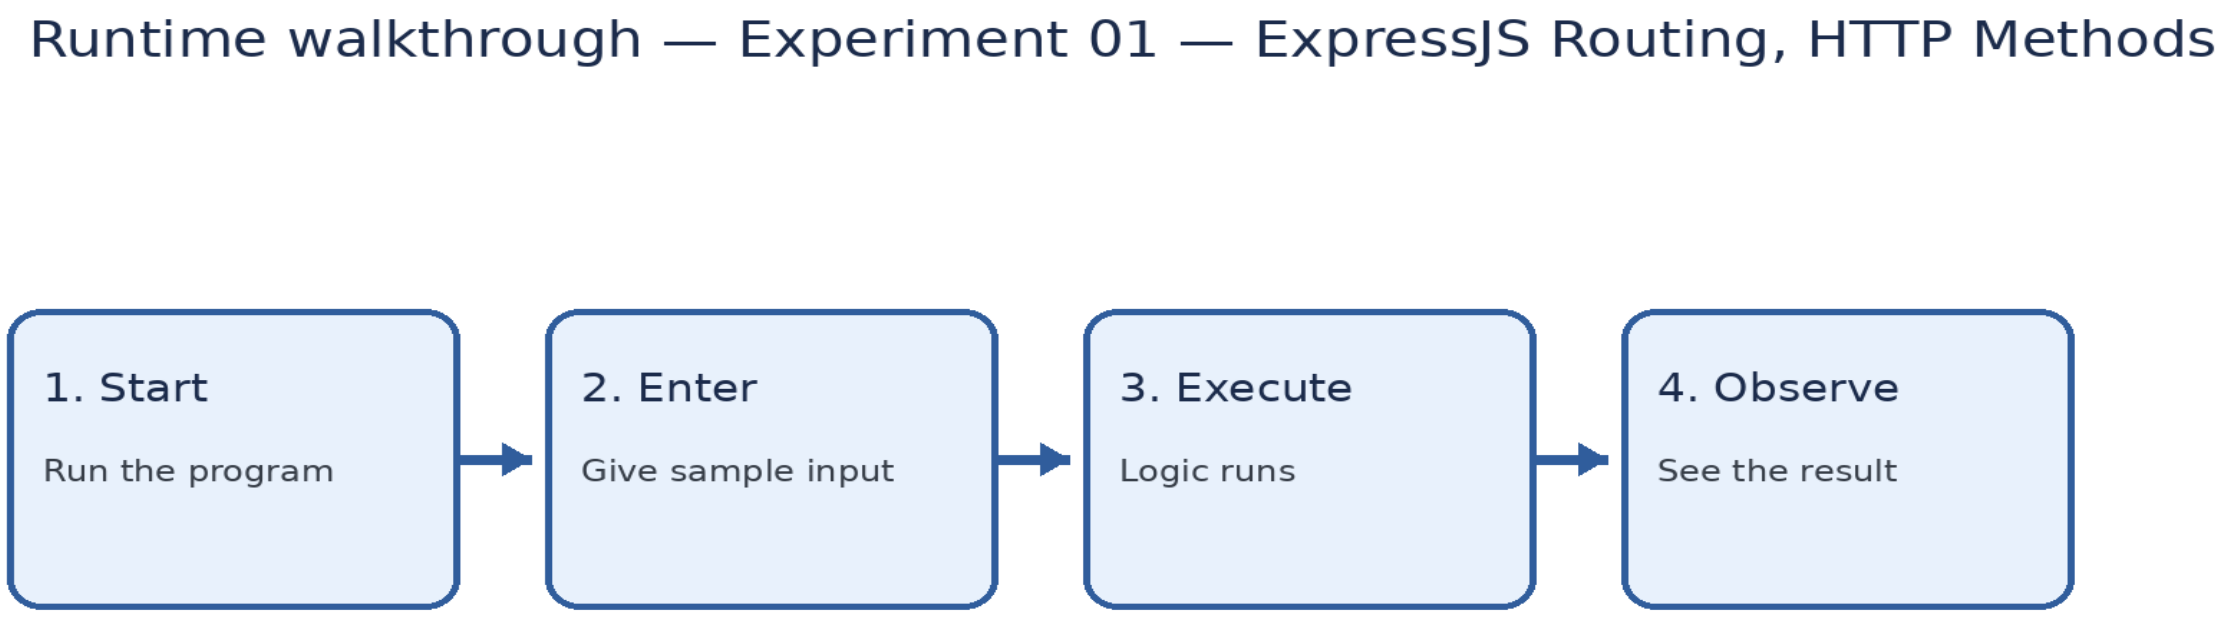

3.1. Code pathway — app.js

```
/**
 * Experiment 01: ExpressJS Routing, HTTP Methods and Middleware
 *
 * What it demonstrates:
 * - Express server setup
 * - Custom middleware
 * - Route parameters and query parameters
 * - URL building
 * - GET, POST and DELETE methods
 */
```

3.2. Code pathway — app.js

```
11
12 const express = require('express');
13
14 const app = express();
15 const PORT = 3001;
16
17 // ------------------------------------------------------------
18 // Middleware
19 // ------------------------------------------------------------
20
```

4. Runtime walkthrough

Runtime: start → enter → execute → observe

5. Run and observe

- Start the server / Vite app or open the MongoDB shell as described in the experiment README.
- Enter the sample input or call the required route.
- Watch the terminal for logs and errors.
- Verify the browser, API response, or database result.

6. Viva questions

- What is the purpose of this experiment?
- Which input is required?
- Which line or command performs the main operation?
- What output should you observe?
- What happens when the input changes?
